SHIAR FOOAD HAWEEZ

Software Developer & Technical Operations Specialist

Targeting technical & operations roles across Kurdistan, Iraq

PROFESSIONAL SUMMARY

Execution-focused IT graduate who turns ideas into working systems — from desktop software and databases to custom battery hardware and workflow automation. Comfortable owning a problem end to end: writing the code, building the schema, or assembling the circuit. Backed by real operations and marketing experience, plus fluent communication across four languages.

TECHNICAL PROJECTS

- **Machine Learning Sales Forecasting** — built an end-to-end daily sales forecasting model for Rossmann stores in Python (Pandas, scikit-learn, XGBoost) with feature engineering, hyperparameter tuning, and model evaluation. Live on GitHub:
github.com/SJ2005-code/rossmann_sales_forecast
- **Windows Forms Application Suite** — built a custom administrative system, accounting software, and a flight management app in C# with normalized SQL Server databases and optimized queries.
- **Workflow Automation & Hardware** — wrote CMD scripts that automated repetitive multi-step tasks, and assembled custom lithium battery packs with TP4056 modules, BMS, and circuit protection.
- **Database Graduation Project** — delivered a full database solution (queries, views, maintenance procedures) for official evaluation at Khabat Technical Institute.

PROFESSIONAL EXPERIENCE

NORDO Restaurant — Erbil

Operations & Marketing Specialist | Aug 2026 – Present

- Led promotional design, branding, and social media campaigns for the restaurant's grand launch.
- Built internal financial tracking templates and streamlined day-to-day digital workflows.
- Managed the verified Google Business Profile listing and local customer engagement.

Al Najar Company — Erbil

IT Practical Training Intern | Jun 2026 – Aug 2026

- Applied core IT principles in a live commercial environment, documenting procedures and supporting daily system operations.

Hospitality & Retail

Cook / Cashier / Customer Support

- Delivered fast-paced customer support and operated POS systems while keeping front-line service efficient.

WHY HIRE ME

- Short learning curve — independently bridges technical gaps across software, hardware, and operations.
- Consistent execution pattern: identify the problem, pick the right tool, ship a working result.
- Multilingual and comfortable across international, cross-functional teams.
